FONDANT (CASTER SUGAR) FIGURINES

Workshop by: Lidija Vrbanić, dipl. ing.

Translated by: Ivana Jurković

Presented by: Julijana Čoh

Ivan Fištrek

- One of our food technology teachers, Lidija Vrbanić, got the idea to hold extra classes on Saturdays and teach the students how to make fondant/caster sugar figurines

- Not many students were familiar with the process or material itself, but they wanted to put some theory into practice and have fun while doing it

- Students immediately got the ideas what to make and what to do with the figurines later (Christmas was coming...)

The fun started.....

Ingredients were there:

- Caster sugar
- fructose
- gelatine
- Glycerol
- Edible food paint

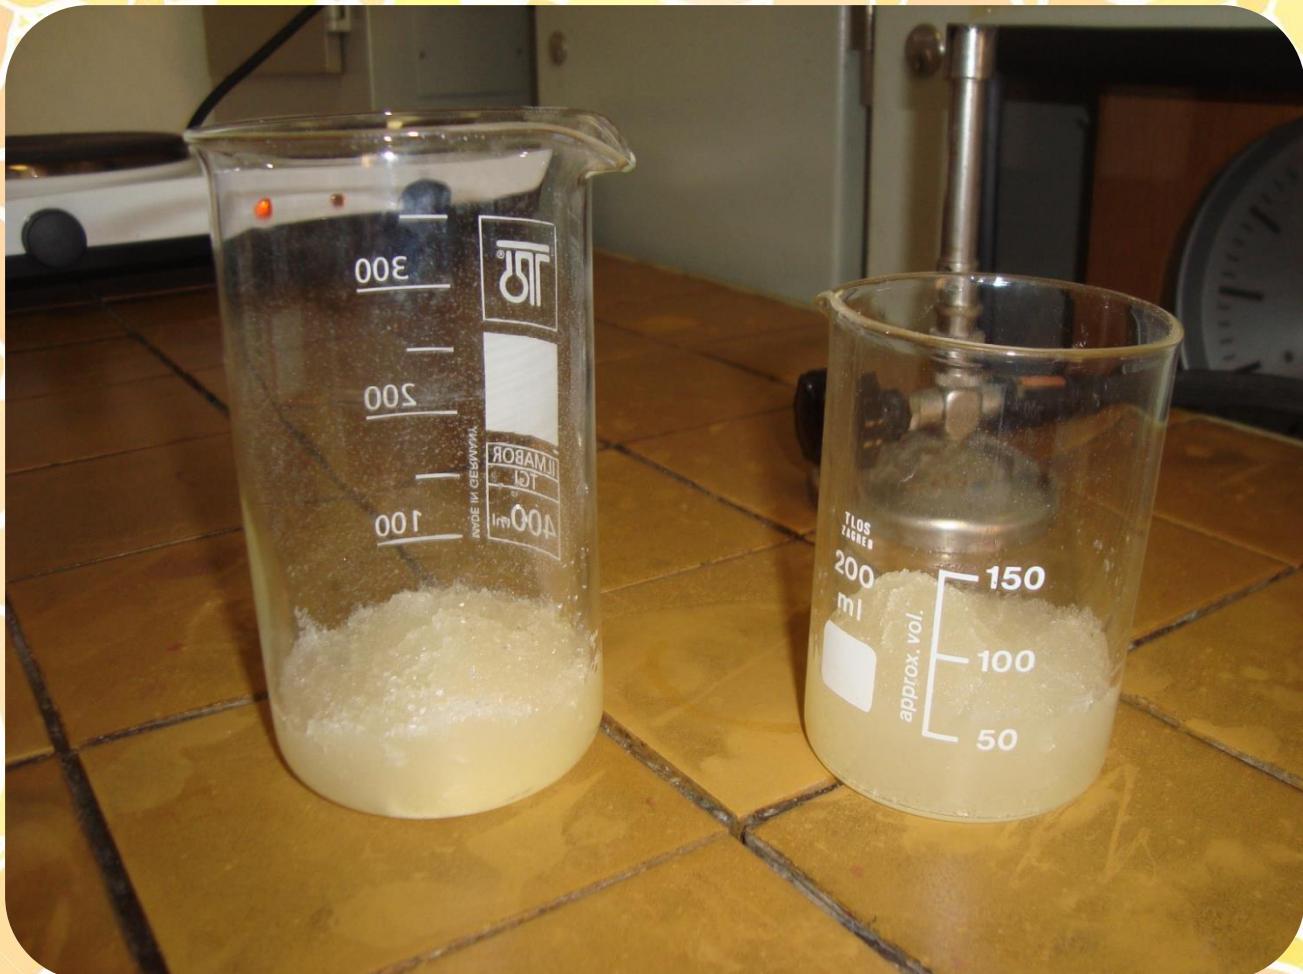

.... They went through the recipe....

....which you have to follow closely for everything to work out fine😊

1) Mix gelatin and water

mase, Lidija Vrbanić

2) Heat the fructosis but don't let it caramelize

mase, Lidija Vrbanić

3) Put caster sugar into mixing bowl

4) Mix glycerol and melted fructosis

5) Add gelatine and mix it with the mixture of glycerol and fructose

6) Add everything to the bowl with caster sugar and mix well

6) Your hands need to be warm....

• ...just about done

There you go 😊

- You can color the mass with edible (washable) gel paints

The figurines are to be sold
during Christmas sale at our
school; money is to be donated to
charities

Ready to be sold
